WAR DEPARTMENT,

WASHINGTON 25, D. C., 15 October 1943.

FM 21-30, Conventional Signs, Military Symbols, and Abbreviations, is published for the information and guidance of all concerned.

[A. G. 300.7 (21 May 43).]

BY ORDER OF THE SECRETARY OF WAR:

G. C. MARSHALL,

Chief of Staff.

OFFICIAL:

J. A. ULIO,

Major General,

The Adjutant General.

DISTRIBUTION:

B and H (5); R (10); Bn (5), 1 (10); C (10).

(For explanation of symbols see FM 21-6.)

PART I

GENERAL MAPPING

CHAPTER 1 · GENERAL

1. PURPOSE. This manual gives in convenient form the abbreviations and general symbols which have been authorized for military use. It contains technical symbols and instructions for the map maker, and military symbols for the use of those in the military service. Persons engaged in the preparation of maps should also be guided by AR 300-15, TM 5-230, and Bulletin 788, Topographical Instructions of the United States Geological Survey. Those whose duties require them to read foreign topographic and military maps should consult FM 30-22.

Symbols other than those shown herein may be used provided they do not conflict with any authorized symbols and are explained in a legend.

2. SCOPE. Part I of this manual deals with general topographic, hydrographic, and air navigational symbols and abbreviations prescribed for use on all United States maps. Part II contains symbols of a military nature authorized by the War Department. Part III gives authorized military abbreviations.

3. SIZE. a. In general, topographical symbols resemble the objects which they represent. The symbols vary in

size with the scale of the map. On small-scale maps, the symbols are reduced to their most elementary form and do not conform to scale. As the scale is increased, the symbols assume more nearly the shape and scaled size of the object represented.

b. The symbols in this book are generally of a size suitable for use on a map of scale 1:62,500, unless otherwise noted.

4. COLOR. The symbols are shown in appropriate color for a four-color map. When less than four colors are used, the colors in the symbols shown in chapters 2, 3, and 5 which are not used will be executed in black ink.

5. LETTERING. Civil divisions are indicated by VERTICAL ROMAN type; natural water features by SLANT ROMAN type, or italic; natural land features by VERTICAL GOTHIC type; and works of man by SLANT GOTHIC type. On hastily prepared military maps, the lettering may vary considerably from these standards.

6. MARGINAL DATA. The data shown on chart 1 are given, where practicable, in the margins of all maps, photomaps, or aerial photographs, and usually in the places indicated by the encircled figures. On military maps, overlays, and field sketches, only essential information concerning the kind of map, orientation, date of preparation, source, and scale are shown, and then not necessarily in the margins. For detailed information on marking aerial photographs see FM 30-21.

1. Series name and scale.
2. Sheet name on foreign maps.
2. "WAR DEPT., CORPS OF ENGINEERS,
U. S. ARMY" on U. S. maps.
3. Sheet number on foreign maps.
3. Sheet name on U. S. maps.
4. "For use by" note on foreign maps.
5. Edition data.
6. Series size on U. S. maps.
7. Adjoining sheet names on U. S. maps.
8. Latitude values.
9. Longitude values.
10. Graphic mileage scale.
11. Series number and edition dates on foreign
maps.
11. Edition dates for U. S. maps.
12. Credit legend.
13. Special legend symbols.
14. Representative fraction.
14. Miles and yards graphic scale on U. S. maps.
14. Miles, yards, and kilometers graphic scale
on foreign maps.
15. Contour interval.
16. Grid notes.
17. Officers note.
18. Plant imprint.
19. Sheet name, filing name, and location.
20. Geographic index number.
21. Road destination notes as required.
22. Meters to feet conversion table for foreign
maps.
23. Glossary for foreign maps.
24. Reliability diagram where required.
25. Projection and horizontal datum on U. S.
maps.
26. Projection on foreign maps—Vertical datum
on U. S. maps.
27. Declination diagram.
28. Designation of military grid.
29. Zones of military grid.

NOTE.—information on grids, World Polyconic, U. S. Domestic, State, and British Grids will be found in FM 21-25.

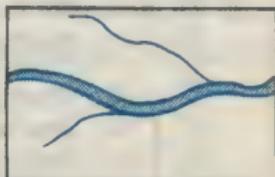

Chart 1.—Marginal data for maps, photomaps, and aerial photographs.

CHAPTER 2

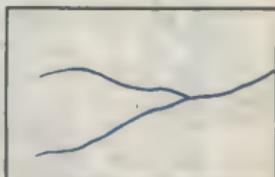

PRIMARY TOPOGRAPHIC SYMBOLS

7. GENERAL. This chapter gives the symbols used on United States maps for drainage, relief, and land classification. For topographic abbreviations, see chapter 6.

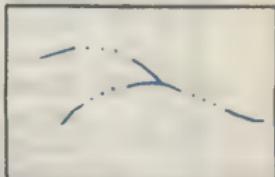

Perennial stream (large)

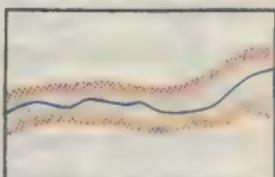

Perennial stream (small)

Intermittent stream

Stream with wash. Dark blue line indicates limit of permanent stream. Brown wash symbol indicates size of normal maximum channel. Intermittent stream in interior of wash will be shown if no permanent stream exists.

Anastomosing or braided stream

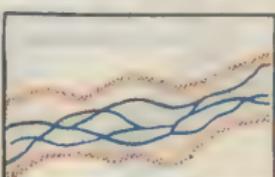

Chart 2.—Drainage.

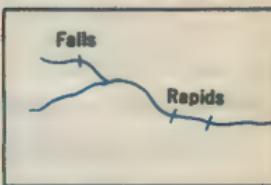

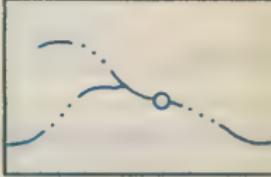

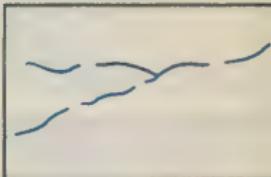

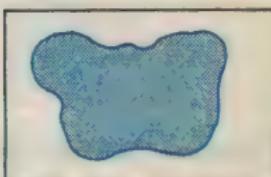

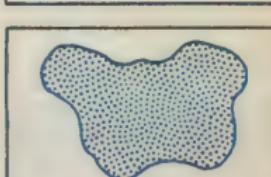

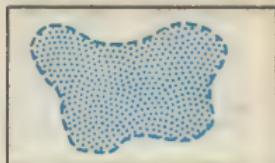

- Falls and rapids—large scale map..... 
- Falls and rapids—small scale map..... 
- Waterhole..... 
- Probable drainage, unsurveyed..... 
- Lakes and ponds: (permanent)..... 
- Lakes and ponds: (intermittent)..... 
- Lake or pond (dry bed) and claypans
(with appropriate text)..... 
- Lakes and ponds (salt-permanent)..... 

Chart 2.—Drainage—Continued.

Lakes and ponds (salt-intermittent)

Lakes and ponds (salt-dry) (saltpans)
(with appropriate text)

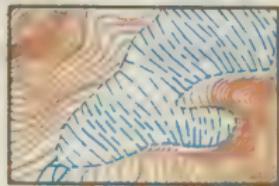

Spring

j

Wells and water tanks

..

Glaciers, form lines showing flow

Glacial surface moraine

Snow field

Chart 2.—Drainage—Continued.

Contours (blue if under water)

Contours (approximate only)

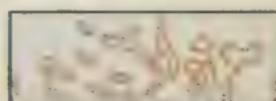

Form lines (no definite interval)

Hachures

Depression contours

Cuts

Fills (Where high railroad or highway embankments occur, the use of hachures to represent the bank or grade is recommended instead of extensive use of depression contours covering large areas of the sheet.)

Mine dump (ore)

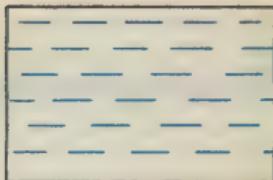

Tailings

Chart 3.—Relief.

Bluffs	<p>Rocky (or use contours)</p> <p>Other than rocky (or use contours)</p>		
Sand and sand dunes		
Washes		
Gravel		
Rocky land		
Lava		
Moraine, or esker		

Chart 3.—Relief—Continued.

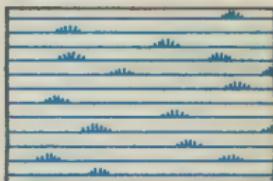

Overflowed land.....

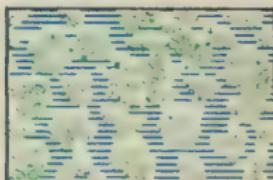

Marsh (if peat bog add appropriate
text).....

Salt marsh.....

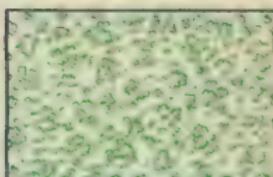

Cypress swamp.....

Woodland (or as shown below).....

Woodland (or broadleaved trees).....

Logged-off or burned-off area.....

Dense woods or jungle growth.....

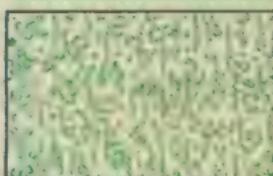

Chart 4.—Land classification.

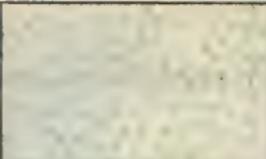

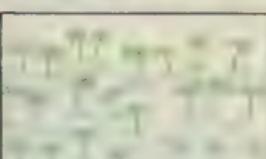

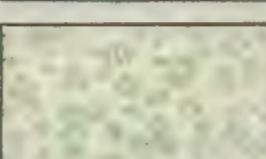

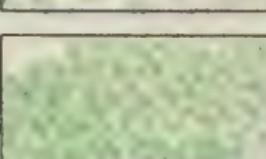

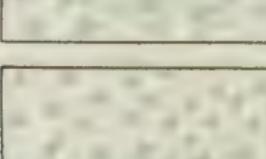

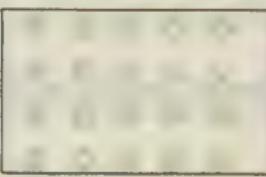

Pine (or narrow leaved trees)	
Palm	
Palmetto	
Mangrove	
Bamboo	
Cactus	
Banana	
Orchard	 or 

Chart 4.—Land classification—Continued.

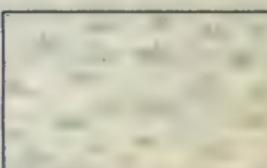

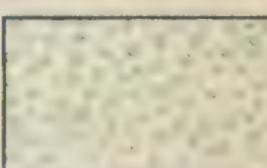

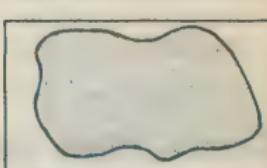

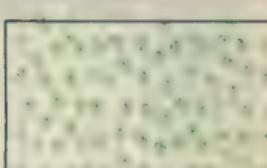

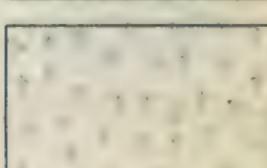

Vineyard	
Grassland in general	
Tall tropical grass	
Cultivated fields in general (Scale 1:31,680 and larger)	
Cotton	
Rice field	
Sugarcane	
Corn	

Chart 4.—Land classification—Continued.

CHAPTER 3

HYDROGRAPHY

8. GENERAL. This chapter gives hydrographic and aids to navigation symbols used on United States maps. These symbols are approved by the United States Coast and Geodetic Survey. For hydrographic abbreviations, see chapter 6.

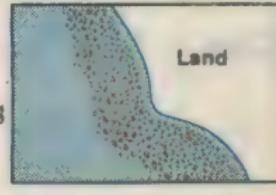

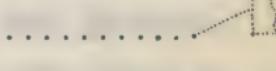

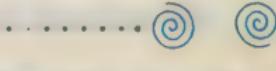

Shore lines	Surveyed	
	Unsurveyed	
	In general	
	Rocky ledges	
Shores (high and low water lines and areas between)	Coral reefs	
	Gravel and rocks	

Chart 5.—Hydrography, dangers, obstructions.

Shores (high and low water lines and areas between)—Con.	Mud.....	
	Tidal flats.....	
Kelp or eel grass.....		
Ice limits-shelf ice.....		
Rock under water.....		+
Rock awash (at any stage of the tide).....		*
Breakers along shore.....		
Fishing stakes.....		
Fish weir.....		
Salt evaporator.....		
Overfalls and tide rips.....		
Limiting danger line.....		
Whirlpools and eddies.....		
Chart 5.—Hydrography, dangers, obstructions—Continued.		

Wreck (any portion of the hull or superstructure above low water)	
Sunken wreck (dangerous to surface navigation)	
Sunken wreck (not dangerous to surface navigation nor those over which the depth exceeds 10 fathoms)	
Foul ground	
Number of sunken wrecks	
Current, not tidal, velocity 2 knots	
(Special usage)	
Tidal currents	Flood, 1½ knots
	Ebb, 1 knot
	Flood, second hour
	Ebb, third hour
No bottom at 50 fathoms	50
Depth curves:	
1-fathom or 6-foot line	
2-fathom or 12-foot line	
3-fathom or 18-foot line	
4-fathom line	
5-fathom line	
6-fathom line	
10-fathom line	
20-fathom line	
30-fathom line	
40-fathom line	
50-fathom line	
100-fathom line	

Chart 5.—Hydrography, dangers, obstructions—Continued.

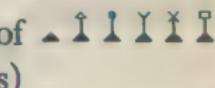

Lifesaving station (in general)	◆ L.S.S.
Lifesaving station (Coast Guard)	◆ C.G. 165
Lighthouse	★
Lighthouse on small-scale chart	•

Chart 6.—Aids to navigation—Continued.

CHAPTER 4

AERONAUTICAL CHART SYMBOLS

(To be reproduced in magenta)

9. GENERAL. The conventional signs for use on aeronautical charts differ from those used on topographic maps as follows:

- a. All symbols are larger and more striking to the eye.
- b. Those features on the ground which are easily identified from high altitudes are emphasized on aeronautical charts. Other features are subordinated or omitted entirely.

Airports:

Unclassified	⊕
Military field	○
Joint military-civil	○
Commercial or municipal	○
Flight strip (landing area adjacent to highway; symbol indicates direction of runway)	⊖

Emergency landing field	+
-----------------------------------	---

Seaplane ports:

Base with complete facilities	⊕
Anchorage with limited facilities	△
Protected anchorage with no facilities	□

Beacons:

Rotating, with flashing code beacon	*
Rotating, with course lights and code	→ * 27 —
Flashing code	*
Flashing	*

Chart 7.—Aeronautical chart symbols.

Obstruction (center of symbol marks location) A 205

Prominent elevation (numerals indicate height in feet) 862

Mooring mast └

National or state	
County line	
Civil township, district or precinct	
Reservation line	
Land-grant line	
Metropolitan area	

Cemetery, small park, etc

U. S. township, section, and quarter-section lines (any one for township line alone, any two for township and section lines)

Located U. S. township and section corners

Boundary monument

Triangulation point or primary traverse station

Permanent bench mark (and elevation)

Precise bench mark

Intermediate bench mark (and elevation)

U. S. mineral monument

Observation spot (astronomical position)

Any located station or object (with explanatory note)

Chart 12.—Boundaries, marks, and monuments.

CHAPTER 6

GENERAL MAPPING ABBREVIATIONS

SECTION 1

TOPOGRAPHIC ABBREVIATIONS

11. GENERAL. The abbreviations listed below are prescribed for use on all United States maps. Besides those listed in this section, those abbreviations listed in section II and also in chapter 10 are used when appropriate:

A.....	arch or arroyo
abut.....	abutment
b.....	brick
bot.....	bottom
Br.....	branch
br.....	bridge
C.....	cape
cem.....	cemetery
con.....	concrete
cov.....	covered
Cr.....	creek
cul.....	culvert
DS.....	drug store
E.....	east
Est.....	estuary
f.....	fordable
Ft.....	fort
gir.....	girder
i.....	iron

I.	island
Jc.	junction
kp.	king-post
L.	lake
Lat.	latitude
Ldg.	landing
LSS.	lifesaving station
LH.	lighthouse
Long.	longitude
Mt.	mountain
Mts.	mountains
N.	north
nf.	not fordable
p.	pier
pk.	plank
PO.	post office
Pt.	point
qp.	queen-post
R.	river
RH.	roundhouse
RR.	railroad
2d.	second
S.	south
s.	steel
Sch.	schoolhouse
Sta.	station
St.	stone
str.	stream
TG.	tollgate
3d.	third
Tres.	trestle
tr.	truss
WT.	water tank
WW.	waterworks
W.	west
w.	wood

SECTION II

ABBREVIATIONS USED WITH HYDROGRAPHIC SYMBOLS

12. GENERAL. The following abbreviations, for use with hydrographic symbols, are authorized for all United States nautical maps and charts. These abbreviations are approved by the Federal Board of Surveys and Maps and are used by the United States Coast and Geodetic Survey and Hydrographic Office.

13. RELATING TO LIGHTS.

AERO.....	aeronautical
Alt.....	alternating
Bu.....	blue
D.....	destroyed
ev.....	every
Exper.....	experimental
F.....	fixed
F Gp FL.....	fixed and group flashing
F FL.....	fixed and flashing
FL.....	flashing
G.....	green
Gp.....	group
Gp FL.....	group flashing
Gp Occ.....	group occulting
Hor.....	horizontal
I Qk.....	interrupted quick
Irreg.....	irregular
Lt.....	light
Lt Ho.....	lighthouse
m.....	nautical mile

min.	minutes
OBSC.	obscured
Occ.	occulting
Priv maintd.	private light (maintained by private interests; to be used with caution)
Qk FL.	quick flashing
R.	red; range
REF.	reflector
Rev.	revolving
sec.	seconds
SEC.	sector
S-L.	short-long
Temp.	temporary
(U).	unwatched
VB.	vertical beam
Vert.	vertical
vis.	visible
W.	white

14. RELATING TO FOG SIGNALS.

DFS.	distance finding station
FB.	fog bell
FD.	fog diaphone
FG.	fog gong; fog gun
FH.	fog reed; fog horn
FN.	fog nautophone
FS.	fog siren; fog signal station
FT.	fog trumpet
FW.	fog whistle
SB.	submarine fog bell (mechanical)
SFO.	submarine fog oscillator

15. RELATING TO DANGERS.

Bk.	bank
cov.	covers

<i>D</i>	doubtful
<i>ED</i>	existence doubtful
<i>Obstr</i>	obstruction
<i>PA</i>	position approximate
<i>PD</i>	position doubtful
<i>Pos.</i>	position
<i>rep.</i>	reported
<i>Shl.</i>	shoal
<i>uncov.</i>	uncovers
<i>Wk</i>	wreck
<i>Wks.</i>	wreckage

16. RELATING TO TIDES AND CURRENTS.

<i>HW</i>	high water
<i>HHW</i>	higher high water
<i>LW</i>	low water
<i>LLW</i>	lower low water
<i>MHW</i>	mean high water
<i>MHHW</i>	mean higher high water
<i>MLW</i>	mean low water
<i>MLLW</i>	mean lower low water
<i>MSL</i>	mean sea level
<i>MTL</i>	mean tide level

17. RELATING TO QUALITY OF BOTTOM.

a. Material.

<i>Bld(s)</i>	boulder(s)
<i>Ck</i>	chalk
<i>Cl</i>	clay
<i>Cn</i>	cinders
<i>Co</i>	coral
<i>Co Hd</i>	coral head
<i>Di</i>	diatom
<i>G</i>	gravel
<i>Gl</i>	globigerina
<i>Grs.</i>	grass

<i>La</i>	lava
<i>M</i>	mud
<i>Ml</i>	marl
<i>Oys</i>	oysters
<i>Oz</i>	ooze
<i>P</i>	pebbles
<i>Pm</i>	pumice
<i>Rk</i>	rock
<i>S</i>	sand
<i>Sh</i>	shells
<i>Sp</i>	specks
<i>Spg</i>	sponge
<i>St</i>	stones
<i>Vol Ash</i>	volcanic ash

b. Quality.

<i>brk</i>	broken
<i>crs</i>	coarse
<i>dk</i>	dark
<i>fly</i>	flinty
<i>fne</i>	fine
<i>glac</i>	glacial
<i>gty</i>	gritty
<i>hrd</i>	hard
<i>lrg</i>	large
<i>lt</i>	light
<i>rky</i>	rocky
<i>sft</i>	soft
<i>sml</i>	small
<i>spk</i>	speckled
<i>stf</i>	stiff
<i>stk</i>	sticky

c. Color.

<i>bk</i>	black
<i>br</i>	brown
<i>bu</i>	blue
<i>gn</i>	green

<i>gy</i>	gray
<i>rd</i>	red
<i>wh</i>	white
<i>yl</i>	yellow

PART II

MILITARY MAPPING SYMBOLS

CHAPTER 7

MILITARY UNITS

21. IDENTIFICATION. **a.** The symbols in chart 13 are used to indicate military units or their activities on maps, sketches, and overlays. Where the use of the identifying symbol of a military unit is impracticable, abbreviations are employed.

b. These symbols are used either within a rectangle to indicate a military unit, a triangle to indicate an observation post, or a circle to indicate a supply point.

22. SIZE. The symbols in chart 14 are used to indicate the size of a military organization. They are used mainly with boundary symbols, or with rectangles, triangles, or circles in conjunction with the symbols in chart 13. See charts 17 and 26-40.

Antiaircraft Artillery

Armored Command

Army Air Forces

Artillery, except Antiaircraft Artillery

Chart 13 —Military units—identification.

Cavalry (horse)	
Mechanized	
Chemical Warfare Service	
Engineers	
Special (amphibian)	
Infantry	
Medical Corps	
Military Police	
Ordnance Department	
Quartermaster Corps	
Signal Corps	
Tank destroyer	
Transportation Corps	
Veterinary Corps	

NOTES.—1. Coast Artillery Corps uses the artillery symbol, with appropriate abbreviations. See chart 31.

2. Airborne units are designated by combining a gull wing symbol with the arm or service symbol. Examples:

Airborne Artillery

Airborne Infantry

3. For units attached to Air Forces, the arm or service symbol is placed over the Air Forces symbol. Examples:

Aviation signal unit

Aviation ordnance unit

Chart 13.—Military units—identification—Continued.

The following symbols are placed either in boundary lines (see chart 17) or above the rectangle, triangle, or circle inclosing the identifying arm or service symbol.

Squad	.	.
Section	.	..
Platoon
Company, troop, battery, or Air Forces flight	.	1
Battalion, cavalry squadron, or Air Forces squadron	.	II
Regiment or group; combat team (with abbreviation CT following identifying numeral)	.	III
Brigade, combat command of armored division, or Air Forces wing	.	X
Division, or command of an Air Force	.	XX
Corps or Air Force	.	XXX
Army	.	XXXX
Service command, department, or section of com- munications zone	.	OOO
Communications zone	.	OOOO
General Headquarters	.	GHQ

Chart 14.—Military units—size.

CHAPTER 8

MILITARY ACTIVITIES

23. GENERAL. **a.** This chapter contains symbols used for military purposes on maps, charts, and overlays. These symbols are authorized for all military use, but they are used mainly on large-scale maps. No departures from these symbols should be made unless none of these signs applies or when the scale of a map prevents their use.

b. Special signs and symbols of a technical nature, such as signal wiring diagrams, construction blueprints, engineer construction symbols, or coast artillery fire-control maps, may be found in Field and Technical Manuals of the arm or service concerned.

24. COLOR. When colors are used, military symbols representing objects in territory occupied or controlled by our forces are shown in blue, and those in territory occupied or controlled by the enemy are shown in red. The only exceptions are the following:

a. Symbols for areas to be covered by friendly fire or gas, although generally located in enemy territory, are executed in blue.

b. Symbols for gassed areas, wherever located, are always executed in red.

Military airdrome, general

Commercial or municipal airfield

Army Air Forces air base or service center

Chart 15.—Air activities.

25. ROAD AND BRIDGE CLASSIFICATION.

On topographic maps, road classification is as shown in chart 8. Military traffic control symbols are shown in chart 24. For military field sketches and topographic reconnaissance, the classification system described in this paragraph is used. The characteristics of roads and bridges are indicated by the following symbols and abbreviations:

a. General road types.

Physical characteristics	Type of surface		
	All weather		Earth
	Paved: such as concrete, bituminous, brick, or other pavement	Improved: such as gravel, crushed rock, stabilized soil, select granular material, or other wearing material	Unimproved: dusty when dry; muddy when wet
Good road (gentle grades, gradual curves, smooth surface, good foundation).	A	C	E
Poor road (steep grades, sharp curves, rough surface, or poor foundation).	B	D	F (probably impassable in wet weather).

¹ Includes roads of these materials which have had a treatment to lay dust or which are covered by a bituminous surface treatment or seal coat.

b. General characteristics of roads and bridges.

(1) Traffic lanes.

1, 2, 3, etc. Placed after road type symbol to indicate roadways suitable for continuous traffic in one, two, three, etc., lanes respectively.

1+ One-lane roadway having occasional passing locations, and suitable for very light two-way traffic.

1½ One-lane roadway having frequent passing location, and suitable for light two-way traffic.

2 Two-lane roadway having occasional one-lane defiles, and suitable for moderate two-way traffic.

(2) Information.

W Followed by numeral indicates clearance width in feet provided at most critical location. Symbol is preceded by numeral to indicate more than one such lane (for example, 2 W 9 indicates two separate lanes, each of which provides a clearance width of 9 feet).

Cl Followed by numeral indicates clearance height in feet between surface of roadway and overhead obstruction.

T Preceded by numeral indicates tonnage limitation.
(Bridges.)

Mi Preceded by numeral indicates distance in miles.

I Followed by numeral indicates average interval of time (time-distance) in minutes required by motor vehicles during daylight to travel section of road shown.

c. Engineer characteristics of roads and bridges.

(1) Roads.

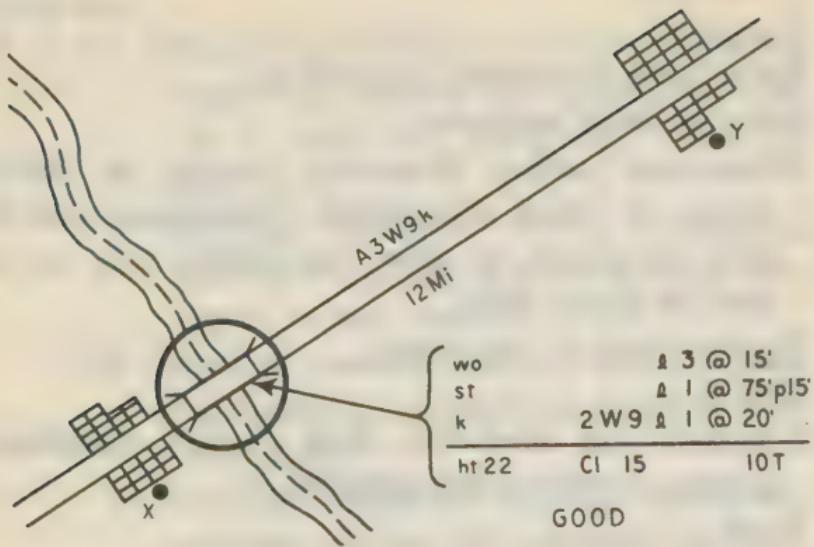

Concrete	k
Bituminous pavement, heavy duty	bt
Brick or block pavement	br
Bituminous surface treatment (except on concrete, brick, or block pavement), bituminous stabilized sand or gravel, or other bituminous type not suitable for heavy duty	bs
Crushed rock or macadam	m
Gravel	g
Stabilized soil, sand-clay, shell, cinders, disintegrated granite, or other select material	sm
Earth	ea

(2) Bridges.

Concrete, slab or beam	k
Concrete arch	ka
Steel beam	sb
Steel truss	st
Steel girder	sg
Stone arch	sa
Wood trestle	wo
Wood truss	wot
Length	l
Height above stream bed	ht
Panel length (trusses)	p
Condition (state as "excellent," "good," "fair," or "poor.")	

d. Example (see chart 19). Sketch between villages X and Y with good, all-weather, three 9-foot lanes, concrete road, 12 miles long, and a multiple bridge 140 feet long consisting of 45 feet of wood truss, and 20 feet of concrete beam and 75 feet of steel truss with 15-foot panels; 18-foot roadway width, 22 feet above stream bed, 15-foot clearance, capable of carrying 10 tons, and in good condition.

Road and bridge classification:

Special engineer landing craft:

Command and navigation, or patrol, boat...

Landing craft, mechanized (LCM).....

Salvage boat.....

Landing craft, vehicle-personnel (LCVP)....

Chart 19.—Engineer symbols.

Trench for one squad.....

Isolated dugout.....

Area to be gassed, nonpersistent (indicate date and hour—*see chart 18*).

Area blanketed by smoke (time effective).

Mines and mine fields:

Land mines:

Single string of antitank mines.....

Activated antitank mine.....

Double antitank mine.....

Double activated antitank mine.....

Pressure type antipersonnel mine.....

Trip-wire type antipersonnel mine

Chart 21.—Obstacles.

Mines and mine fields—Continued.

Land mines—Continued.

Booby trap.....

Mine detector.....

Mine fields.—The color green should be used to designate mine field areas, demolitions, road blocks, and other engineer obstacle activities. The color green is to be used for no *other* military activity. When the color green is not available, the symbol will be executed in black.

To be reproduced in *green*
(in black if green is not available).

Mine belt; numerals in rectangle indicate number of mines in belt. *D* in rectangle represents dummy mine field. Mines in definite pattern; boundaries drawn to scale to indicate actual extent of belt.....

Boundary of mine field unfenced.....

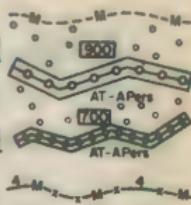

Boundary of mine field indefinite, unfenced.....

Boundary of mine field, fenced with barbed wire. Numerals indicate number of strands in fence.....

Example of symbols in mine field. Scattered mines between boundaries and between belts are indicated schematically by small circular marks.....

Marine mines, controlled 

(This symbol indicates one 19-mine group, and a separate symbol is used for each group. As it appears here, the upper edge of this page is assumed to be seaward; and on charts the symbols should be correspondingly placed. The length of a mine group being 1,800 feet, the symbol is drawn to scale. Its position represents the contemplated disposition of the mine group.)

Leader gear 

(An energized cable to aid vessels through free passages in marine mine fields. Symbol is used on chart to show exact location.)

Chemical land mine 

Marine nets:

Torpedo net (with gate) 
Antisubmarine net (with gate) 

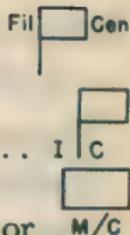

Obstacle, general:

	Proposed	Prepared but passable	Completed
Individual	//	//	X X
Road block	///	///	X X X
Bridge out	///	///	X X X

Tank barrier 

Tank trap

CHAPTER 9

ILLUSTRATIONS OF MILITARY SYMBOLS

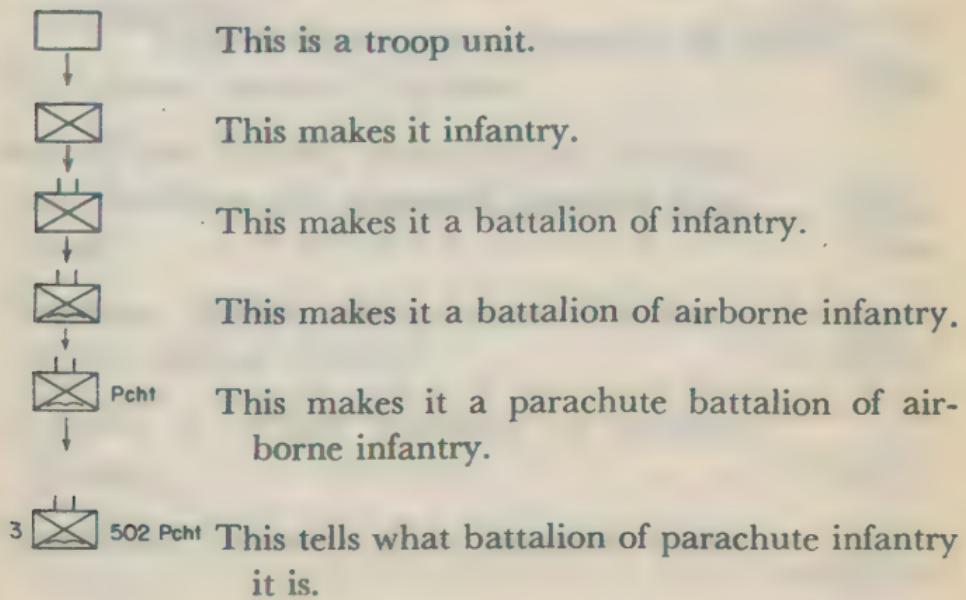

26. UNIT DESIGNATIONS.—This chapter contains examples to illustrate the method of combining basic symbols and abbreviations in order to show the desired information. The following are general rules governing the application of these symbols to rectangles, triangles, or circles representing, respectively, troop units, observation posts, and supply points:

- a.** The basic symbol is placed in the center. (See chart 13.)
- b.** The symbol for the size of the unit is placed above.
- c.** Army and air force are shown by a number spelled out.
- d.** Corps and air force command are shown by Roman numerals.
- e.** When the symbol represents either an army or a corps in its entirety, the numeral designation is placed *inside* the box. When the symbol pertains to a unit within an army or corps, the army or corps numeral is placed on the right, *outside* the box.
- f.** Numbers designating battalions in a regiment are shown on the left, in Arabic numerals.
- g.** Numbers designating separate battalions are shown on the right, in Arabic numerals.
- h.** Numbers designating divisions, brigades, groups, regiments, separate companies, or similar separate units are placed on the right, in Arabic numerals.

- i. Letters designating companies, troops, or batteries are in capitals and are shown on the left.
- j. Companies, troops, batteries, or platoons (not separate), and other elements of a unit which are designated by name instead of by letter (for example, "Antitank Company" or "Headquarters and Service Troop"), are designated by the use of the proper abbreviation on the left.
- k. Abbreviations for explanatory purposes are shown on the right (see ch. 10).
- l. Abbreviations are used instead of symbols to show information that cannot be indicated by a single symbol.
- m. Calibers are shown by numbers placed under the symbol and the unit of measure is omitted.

27. APPLICATION OF SPECIAL SYMBOLS.

The following examples illustrate the method of combining basic symbols and abbreviations in order to show the desired information. These are only a few of the possible combinations. The following diagram illustrates how these symbols are built up:

88th Antiaircraft Artillery Brigade		88
3d Antiaircraft Artillery Group		3
302d Antiaircraft Balloon Battalion (low altitude)		302 LA
101st Antiaircraft Balloon Battery (separate) (very low altitude)		101 VLA

PART III

MILITARY ABBREVIATIONS

CHAPTER 10

LIST OF MILITARY ABBREVIATIONS

28. GENERAL. This chapter is concerned primarily with abbreviations found only in Army field work.

29. DATES AND HOURS. **a. Dates.** Dates are written with the day preceding the name of the month, thus: 15 Jan 1943.

b. Time. Time is indicated according to the 24-hour clock system, in four-digit numbers, the first two digits representing the hour, the second two digits the minutes.

Examples:

0001 means 1 minute after midnight.

0630 means 6:30 in the morning.

1500 means 3:00 in the afternoon.

c. Dates with hours. Dates with hour designations are written as follows:

0630, 15 Jan 1943.

A six digit number may be used, in which case the month is assumed to be the current one. The first two digits indicate the day of the month, and the last four the hour, as explained above. For example: 150630 means 6:30 in the morning of the 15th day of the current month.

d. Greenwich time. If the time is based on Greenwich rather than on local time, the letter "Z" is placed after the hour designation. For example:

0630Z

150630Z

30. LIST OF ABBREVIATIONS AND ITS USES. a.

Kinds of abbreviations. This manual contains abbreviations authorized for use in *field work*, such as field orders, field maps, and messages. For abbreviations used in administrative work, see AR 850-150. In addition to those on the following list the Army is also authorized to use common abbreviations that are generally accepted, such as ft for foot.

b. Capitalization. All abbreviations used in field work have a capitalized initial letter.

c. Punctuation. All abbreviations used are written without periods.
